

LINOLEUM

Linoleum - The nature of tomorrow

Tarkett has been making linoleum flooring for over a hundred years. The process remains very much the same as it ever was, but linoleum today is fresh, dynamic and exciting. It comes with a whole new range of technical qualities that make it an ideal choice for a wide range of uses wherever there's a need for a solution that combines natural quality with resistance to heavy traffic, from education to healthcare. With both compact and acoustic versions, modern linoleum can satisfy the most demanding requirements for appearance, function, cost and sustainability.

Veneto xf/ Veneto acoustic xf	p. 250-253

Silencio xf	p. 258-259
Veneto Soluzione xf	p. 260-261

Linoleum - a surface revolution

With Xf surface protection and Xf welding rods, Tarkett has developed a linoleum flooring with outstanding performance and superior resistance to abrasion and chemicals as well as easy cleaning and maintenance. As a result of less frequent, less intense cleaning and maintenance, Linoleum Xf has very favourable life cycle costs compared with untreated linoleum flooring. The higher capital outlay is recovered within one year.

The sound of silence

Tarkett's Linoleum Silencio Xf and Linoleum Acoustic Xf are the perfect choice wherever you need extra sound insulation. With pre-bonded underlays (polyurethane foam for Silencio and cork for Acoustic), they also offer all the benefits of Xf surface protection.

Colours for every ambience

Tarkett Linoleum has style to match function with 68 dynamic and vibrant colours. With patterns that range from plain solid dark colours, through sensuous softness, brilliant marbling, and dazzling multi-colour styles, the palette now offers a comprehensive choice to create any ambience you need.

Nature's flooring

Made from materials such as linseed oil, pine resin, jute, wood and cork flour, linoleum is the ultimate natural and renewable product. Add the latest innovations in surface treatments to minimise the use of natural resources – water, energy and detergent – for cleaning and maintenance, and linoleum really is the perfect environmentally friendly flooring. ISO 9001 and 14001 certifications recognise the quality of our management systems and the efforts we make to ensure that our production processes respect people and the environment

Heavy Traffic - Compact and Acoustic

LINOLEUM XF

- └ *Natural and renewable raw materials*
- └ *Decorative and warm*
- └ *Wide collection for endless creative possibilities*
- └ *Superior xf surface protection for extreme toughness*
- └ *Excellent resistance to abrasion, stains and chemicals*
- └ *Easy cleaning and maintenance - no initial wax or polish needed*
